

# Point of Use Kit

With a Crystal Mountain Point Of Use Kit, any of Crystal Mountain's coolers can be retrofitted to become a Point of Use dispenser as an alternative to using bottled water. An air filter, incorporated into the top of the lid, protects the integrity of the water from airborne contaminants.

## A World of Possibilities

The Point of Use kit uses a primary float with a secondary backup in conjunction with a 1/4 inch quick connect fitting with cover to protect the fitting and tubing. Easily adaptable, the double mechanical float system installs easily onto the coolers.

Reduce your costs today, by converting an existing Crystal Mountain cooler into a Point of Use.
